

快速入门指南 Quick Installation

① Power the Camera 相机供电

- ① PoE (Power over Ethernet)
POE (通过以太网供电)
- ② 12V external power supply
12V外部电源供电

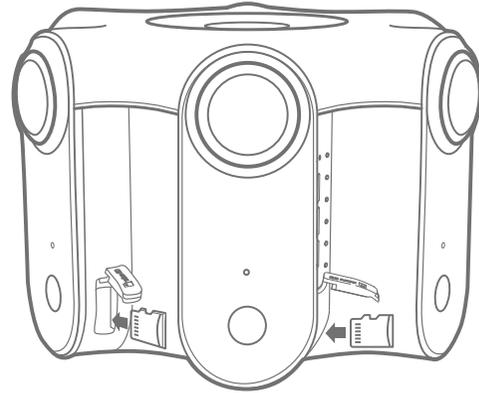

If more than one power source is connected to the camera at the same time, the camera will choose its supply in the order of preference as listed above.

当有多种电源同时连接相机时，相机会根据以上的优先级顺序去选择供电方式。

② Insert MicroSD cards 插入MicroSD卡

Insert all six MicroSD cards into the slots. U3 cards are recommended for maximum speed and stability.

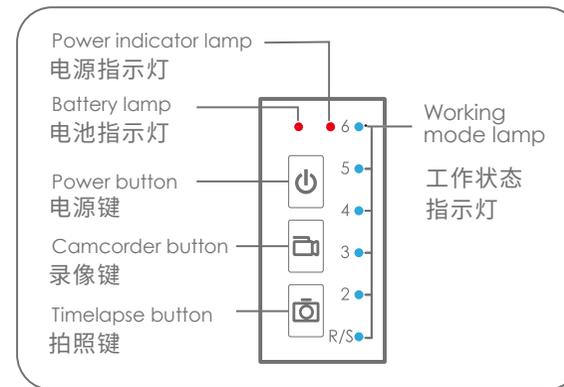

将6张MicroSD卡插入卡槽。为了速度和稳定性，推荐使用U3卡。

③ Power On 开机

Long-press the [Power] button to power on the camera. After the camera is power on, press the [Video] or [Photo] button to start capturing videos or time-lapse photos.

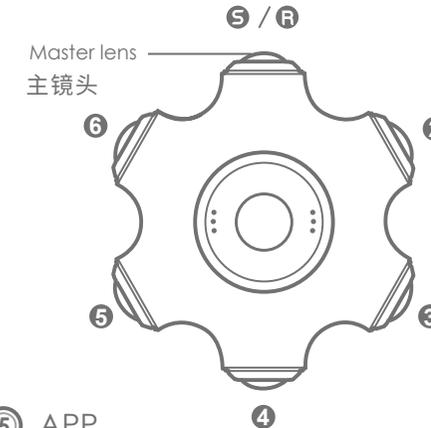

长按电源键开机。开机后，点击【视频】或【照片】按钮开始拍摄视频和延时照片。

④ Master lens 主镜头

The lens labeled "S" or "R" is the master lens of the camera. In default mode, each lens calculates its own exposure parameters (ISO & Shutter Speed) automatically and individually, and all of them follow the Automatic White Balance setting of the master lens. This behavior can be changed in the Obsidian Remote App.

具有“S”或“R”标签的镜头是相机的主镜头。在默认模式中，每个镜头自动独立地计算各自的曝光参数（ISO和快门速度），所有镜头的白平衡参数都跟随主机在自动模式下的白平衡参数。通过Obsidian遥控器手机应用可以改变这些设置。

⑤ APP

Obsidian Remote App enables previewing and control of the camera.

download:
APP Store (IOS)
Google Play Store (Android)
KanDao official website (Android)

Obsidian遥控器手机应用可以让您预览和控制相机。

下载应用：
APP Store (IOS)
Google Play Store (Android)
看到科技公司官网 (Android)

⑥ Studio

Kandao Studio provides a effortless solution for stitching high quality 3D 360 VR videos and photos.

Kandao Studio提供一款简单易用的解决方案去拼接高质量的3D全景视频和照片。您可以通过看到科技公司官网进行下载。

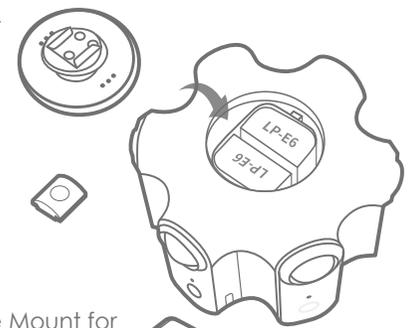

You can download it from Kandao official website.
